RPA USING UIPATH Certification Training Program

International Association

Course Description

The goal of this robotic and automation course is to familiarize the student with the ideas behind robotic process automation. It goes into detail on the characteristics, advantages, and uses of applying robotic process automation methods in enterprises. This online RPA course is intended to assist you in building your automation processes from the ground up to automate tasks including text, the web, Excel, mail, PDFs, VDLs, etc. You will learn how to create end-to-end automation processes based on actual industrial use cases in this RPA course, submit them to the UiPath Orchestrator, and execute them with the aid of your bots.

Key Feature

- 120 hours of training with an instructor
- Much practice with current features
- Learn by doing and go through the entire development cycle
- Advance from basic to intermediate Knowledge of RPA Course

Duration : 8 Weeks

Delivery/Mode : Online/ Physical

Hours : 1 Hours a day

Learning Path

- ▶ Automating Robotic Processes
- ▶ Summary Of Uipath
- ▶ Activities And Process Components
- ▶ Scraping, Recording, And Integration Of Apps
- ▶ Automation Of Pdfs And Data Manipulation
- ▶ Coding, Bug-Fixing, And Logging
- ▶ Other Rpa Tools And The Community Edition Of Orchestrator
- ▶ Using The Reframework
